

INCIDENT MANAGEMENT SITUATION REPORT  
 THURSDAY SEPTEMBER 29, 1994 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Northern California and southern Oregon experienced increased initial attack activity. Scattered precipitation received with the thunderstorms, aided initial attack forces. Most large fires continued to burn actively.

Northern Rockies Area Large Fires:

WARD MOUNTAIN, Bitterroot NF. A Type I Incident Management Team (Bailey) is assigned. Homes continue to be threatened, with the possibility of the fire burning out of the canyons. Water drops helped control the fire spread, while crews attempted to flank the south and north sides.

SIAM, Clearwater NF. A Type II Incident Management Team (Kechter) is assigned. The fire continued to burn actively under light winds. Upper level winds continued to push smoke into the Missoula Valley.

PETER'S RIDGE, Montana State. A Type II Incident Management Team (Bennett) is assigned. Good progress continues despite steep terrain and rolling debris. Helicopter water drops were effective in minimizing spread on the west flank.

LIBBY COMPLEX, Kootenai NF. A Type II Incident Management Team (Bosworth) is assigned. The District and the Team are monitoring fires, and taking action on four fires within the complex.

CABINET COMPLEX, Kootenai NF. A Type II Incident Management Team (Spradlin) is assigned. The two active fires in this complex are the ROBERTS and SMITH PEAK. Snag hazards continue to cause concern.

KOOCANUSA COMPLEX, Kootenai NF. A Type II Incident Management Team (Suenram) is assigned. High temperatures and low humidities continue to contribute to extreme fire behavior which is testing the lines along the north and west flanks. Cloud cover and slightly lower temperatures aided suppression efforts. Afternoon and evening winds continue to push the fire. A structure protection plan is being prepared to compliment the existing evacuation plan.

ROBINSON, Yellowstone NP. A Type II Incident Management Team (Hancock) is assigned. The fire experienced extreme fire behavior, increasing by 1,500 acres. The fire was spotting up to 3/4 of a mile, with a crowning and running flame front. Crews were pulled off the line late yesterday afternoon.

Northwest Area Large Fires:

REED, Malheur NF. A Type II Incident Management Team (Groshong) is assigned. The fire continues to burn toward structures at Duprath Springs, Tempest Mine and Yemon Cabin. Constructed line is at 646 chains, with 152 chains remaining.

FOX POINT, Wallowa-Whitman NF. A Type II Incident Management Team (Lukens) is assigned. Approximately 3/4 mile of line was lost on the north side of the fire. Heavy helicopters and airtankers were used to subdue the fire until crews could cut line. Crews continue to hold the line on the west side and are now building line on the north edge. Two miles of line have been built, with approximately 7 remaining.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST

FOX POINT	WWF	OR	2,075	30	10/3	431	15	0	8	0	UNK	711K

Great Basin Area Large Fires:

THUNDERBOLT, Boise NF. A Type II Incident Management Team (McAtee) is assigned. The fire burned actively, especially portions exposed to the southwest wind. Fire acreage increased on 3 flanks, amounting to an additional 428 acres. Crews successfully finished a burnout. The powerline to Yellow Pine is still intact.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Extreme burning conditions resulted in spotting and crowning runs from 1 to 3 miles. Use of Warren Road remains intermittent.

CHICKEN COMPLEX, Payette NF. The fire gained 685 acres. Previously cold sections of line flared-up, reducing the containment percentage. The fire made several significant runs.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST

CHICKEN CMLPX	PAF	ID	99,305	51	UNK	388	12	6	7	15	UNK	12.9M

North Zone - California Large Fires:

SPECIMEN, Klamath NF. A Type II Incident Management Team (Phenix) is assigned. Cooler temperatures, scattered showers and higher humidities reduced fire activity. Six crews assisted the forest with initial attack from recent lightning activity.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST
				CTN	CTN	PERS				LOST	LOSS	COST
SPECIMEN	KNF	CA	6,205	60	10/1	894	34	8	10	0	UNK	3.1M

Rocky Mountain Area Large Fires:

RAYMOND MOUNTAIN, Rock Springs District, BLM. A Type II Incident Management Team (Hart) has been ordered. Hot, dry and windy conditions are hampering suppression efforts. The fire is burning in timber near the community of Cokeville, WY.

CROW BASIN, Wind River Agency, BIA. This possible hunter fire is burning in timber and is being pushed by winds.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. The support operation in Fairbanks is receiving and distributing supplies to the areas affected by the flood. Building reconstruction, cleaning, debris removal and woodcutting continue.

KOYUKUK FLOOD	AKS	AK			10/31	429	10	0	1	38	UNK	1335M

Outlook: An upper level low pressure system will bring scattered showers and thundershowers to the West, except southern California, central and southern Arizona, New Mexico and Colorado. Highs will be in the 60's and 70's across the northern and central portions of the West, and 70's to 90's across the southern portion, except 105 in the Southwest deserts. Fire activity is expected to moderate with forecasted precipitation across most of the West.
